Assignment

Tasks

- Write a tasks file that installs vim and zip on the servers.
- Write an ansible role called common that uses the role from task 1.
- Write a playbook to call your role from the main directory.
- Add an inventory file.

Challenge

- Create a role that deploys a file with the following content to /tmp/test1 in all hosts:

> Hello world!

- Create a role that deploys a template with the following content to /tmp/test2 in all hosts:

> This servers hostname is: <the server's hostname>

Read about Ansible facts to get this done

What to send me?

Create it all in a git repository called 'hw-14' , push it to github and send me the link.
